STATE OFFICE, EAST LANSING, MICHIGAN 48823

300091

-FOREWORD-

This report presents in narrative and statistical form the accomplishments of the Agricultural Stabilization and Conservation Committees in administering farm programs of the United States Department of Agriculture.

These programs established by the Congress of the United States have, as their objectives, the conserving of our land and water resources and also the maintenance of a reasonable balance between the supply and demand of the products of our soil.

We hope that the data contained in this report will be interesting and useful to the many persons and organizations who are concerned and interested with the progress of agriculture in Michigan.

We extend sincere appreciation and thanks to ASC County and Community Committeemen and county office personnel, cooperating agencies and others who have played such an important part in the successful operation of farm programs in 1969.

MICHIGAN STATE ASC COMMITTEE

Issued March, 1970

## ADMINISTRATION OF ASCS PROGRAMS

The Agricultural Stabilization and Conservation Service (ASCS) is the agency of the U.S. Department of Agriculture which carries out various farm action programs in the general fields of production adjustment, conservation assistance, and price, market and farm stabilization.

Administration of these programs is accomplished through State, County and Community Committees. These committees are composed of farmers who represent various types of farming in the State. They establish the policies that are within their legal and administrative jurisdiction with respect to the operation of all applicable programs of the U.S. Department of Agriculture at the State and County level.

The Michigan State ASC Committee consists of three members appointed by the Secretary of Agriculture. In addition, the Director of the Agricultural Extension Service is an ex-officio member of the Committee.

The State Committee is responsible for the administration of farm programs in the State and for general supervision of the work of county committees. The State Committee appoints a State Executive Director who supervises and directs the work of the State Office staff under policies established by the Committee.

The ASC county committees have three members each, elected annually by farmer-elected delegates to a county convention. In addition, the county agricultural extension agent is an ex-officio member of the Committee.

Each ASC county committee employs a county executive director who, for the committee, hires the necessary employees for office and field work and sees that the day-to-day office operations are effectively performed. The county committee, however, is responsible for programs and administrative policies and decisions at the county level.

- ORGANIZATION -

MICHIGAN STATE ASC COMMITTEE

Nicholas H. Smith, Chairman  
W. Arthur Rowley, Member  
William F. Vanderbeek, Member  
George P. McIntyre, Ex-Officio

## PART II

### AGRICULTURAL CONSERVATION PROGRAM

Under this program, known as "ACP", the Government shares the cost with farmers to encourage and assist them to carry out on their farms soil building and soil-and-water-conservation practices, including related wildlife conserving practices. The program is entirely voluntary and assistance is made available for conservation over and above what farmers would carry-out with their own resources and on their own initiative.

The program also provides for required technical services, as needed, to establish approved practices. These services are made available by special arrangement with the Soil Conservation Service, U. S. Forest Service, State Forester, or others as necessary.

A brief summary of activity for the past five years is listed below.

Year	:	Participating	:	Total Gross
	:	Farms	:	Expenditures
1965		*24,000		\$ 4,799,767
1966		23,116		4,773,001
1967		*24,701		*5,408,825
1968		25,399		5,225,082
1969		18,163		3,829,389

\*Estimated

Specific 1969 program data by congressional districts and counties follows.

### PART III

#### 1969 FEED GRAIN PROGRAM

The 1969 voluntary Feed Grain Program is designed to reduce feed supplies in order to strengthen prices.

To participate in the 1969 Feed Grain Program, producers were required to sign in the program and divert to a conserving base 20 percent of their feed grain base (corn and grain sorghum). No diversion payments were made for this 20 percent minimum diversion, except for a farm with a base of 25 acres or less. Additional acreage diversion for pay was permitted up to a total of 50 percent of the base or 25 acres, whichever was larger.

Participants could also earn price support payments based on the projected yield of acres planted and up to 50 percent of the feed grain base. Additional price support through loans and purchase was also available.

Listed below is a summary of participation by Michigan farmers in the Feed Grain Program for the years 1965-1969:

<u>Year</u>	<u>Participants</u>	<u>Acreage Diverted</u>	<u>Payments</u> <u>Diversion</u>	<u>Price Support</u>
1965	42,233	709,978	\$26,618,948	\$ 5,421,504
1966	45,935	610,129	25,685,951	8,829,356
1967	44,655	413,183	18,856,619	7,589,683
1968	50,300	802,675	25,433,311	8,422,539
1969	54,624	883,103	27,968,888	8,979,106

1969 activity by county and congressional district is listed on the following pages.

## PART IV

### 1969 WHEAT PROGRAM

This production adjustment program is designed and used in an effort to keep production in line with demand and to strengthen prices.

To qualify for 1969 program benefits, producers were required to: (1) sign up in the program during a specified sign-up period; (2) divert to a conserving use an acreage equal to 15 percent of the farm allotment; (3) have an acreage of wheat no larger than the allotment (or permitted if diverting from the allotment or using the substitution between wheat and feed grain provisions) and (4) stay within the allotment or permitted on any other farm in which they had an interest.

Producers who signed and qualified in the program were eligible for price support loans on their entire farm wheat production (National average loan rate \$1.25 per bushel), domestic marketing certificates on 43 percent of the projected production of the farm allotment (value of \$1.52 per bushel), and diversion payments for diverting below the farm allotment. Diversion payment rates were based upon 50 percent of the county wheat loan rate times the farms projected yield.

## PART V

### SUGAR PROGRAM

This program is designed to maintain a healthy domestic sugar industry, provide adequate supplies of sugar for consumers at fair prices, and to promote international trade. These three objectives are achieved through the adjustment of supplies of sugar that may be marketed in the United States.

Government payments are made to producers who comply with certain requirements. These relate to compliance with proportionate shares (when in effect), nonemployment of child labor, and payment of fair and reasonable wages. Special payments are also authorized for crop deficiency or abandonment of planted acreage caused by natural disasters.

Activity for the years 1965 - 1969 is summarized below.

<u>Year</u>	<u>Number of Applications</u>	<u>Acres Planted</u>	<u>Tons of Beets Marketed</u>	<u>Cwt. Sugar Produced</u>	<u>Total Payments</u>
1965	2,674	79,307	1,135,975	3,068,481	\$2,580,221
1966	2,470	78,956	1,148,496	3,164,948	2,584,998
1967	2,318	95,371	1,256,268	3,496,698	2,849,869
1968	2,375	90,946	1,708,311	4,744,920	3,790,202
1969	2,244	93,255	1,503,828	4,441,850	3,571,216

1969 activity by congressional district and counties is listed on the following pages. There was no activity in counties not listed.

## PART VI

### LAND RETIREMENT PROGRAMS

These programs provide for shifting cropland presently not needed for agricultural production into long-term conservation, recreational and open-space use. Participants received adjustment payments related to the value of crops produced on the land.

Programs included under this category are the: Cropland Adjustment and Conservation Reserve (Soil Bank) Programs. An additional part of the Cropland Adjustment Program is known as the Greenspan Provision and was provided to help State and Local Governments establish permanent recreational use of cropland. Such practices include the preservation of open spaces and natural beauty, wildlife habitat, recreation and the prevention of air and water pollution. Another provision provided for additional payments for those who agreed to permit free public access for fishing, hunting, hiking or trapping.

A summary of acreage and payments by county for each program is shown on the following pages.

## PART VII

### PRICE SUPPORT PROGRAM

The price support programs are designed to stabilize farm prices at a level calculated to give farmers a purchasing power on a parity with other segments of our economy. Prices are supported in three different ways - loans, direct payments and purchases on the open market. Loans constitute by far the most important support method. The wool or payment method is outlined in another section of this report and the use of the purchase method was insignificant during the period of this report.

The loan program, financed by Commodity Credit Corporation, gives farmers an opportunity to obtain low interest rate loans on eligible commodities and to hold their crops without market risk for later sale. In practice, if the producer cannot profitably pay off his loan and sell the collateral, the loan may be satisfied in full by letting CCC take over the collateral. The program also gives producers a chance to exercise greater independence in their marketing operations and to benefit from price increases which otherwise may not have occurred until after they sold their products.

Reseal programs on certain commodities, primarily grains, have been authorized for a number of years. Under these programs, farmers are permitted to continue their price support loans on commodities in storage for additional periods and receive storage payments. The storage payments appreciably increase farmers income and the grain is kept in position for consumption in producing areas.

Since price support operations follow a crop or marketing year basis, the 1969 calendar year covered both the 1968 and 1969 crop program operations.

1968 PROGRAM YEAR

QUANTITY OF EACH CROP PLACED UNDER LOAN, DELIVERED TO CCC, PURCHASED, RESEALED AND EXTENDED

COMMODITY	WAREHOUSE STORED		FARM STORED		TOTAL		TOTAL		TOTAL RESEALED

## PART VIII

### FARM STORAGE AND DRYING EQUIPMENT LOAN PROGRAMS

These programs encourage and aid farmers to finance facilities needed for farm storage and conditioning of price-supported grain. Michigan farmers have added over four and a half million bushels of on-farm storage in the last three years through the use of these programs.

Farmers can borrow up to 85 percent of the cost of storage structures and up to 65 percent of the cost of grain dryers. The loans are repayable in four equal annual installments over a period of five years at low interest rates.

CCC-OWNED GRAIN STORAGE

The CCC-owned Grain Storage Program in Michigan consists of 20 bin sites located in 13 counties. The bin sites contain 1,782 silo-type and 35 quonset-type structures with a total storage capacity of 7,249,912 bushels. 3,343,319 bushels of corn, 277,785 bushels of oats, and 59,140 bushels of soybeans were stored in these structures as of December 31, 1969.

## PART X

### WOOL AND MOHAIR PROGRAM

The wool incentive program is designed and encourages the development and expansion of domestic wool production. The program makes a direct payment on shorn wool, mohair and unshorn lambs in an amount calculated to bring the average prices paid for wool and mohair up to a fixed incentive level.

Payments are computed as a percentage of each producer's cash return from wool sales. The rate of payment is the percentage required to raise the National average price received for wool by producers up to a previously announced incentive level (67 cents for wool and 77.4 cents for mohair in 1968). Payments are also made on sales of unshorn lambs at a rate per hundredweight of live animals marketed to compensate for the wool grown on them on a basis comparable to incentive payments on shorn wool.

The first and only mohair payment made in Michigan under this program since it began several years ago was in the amount of \$466.15 made to a producer in Allegan County and covered 2,260 pounds of mohair marketings.

Payments for 1969 not made as of the date of issuance of this report.

## PART XI

### COMPLIANCE

The Compliance Division is responsible for obtaining acreage determinations and checking compliance with the various ASCS farm programs. Generally speaking, compliance is determined in two ways; one method is called producer certification, the other method is an on-farm inspection and measurement by farm reporters.

The certification method consists of farmers visiting the county office and certifying compliance with their program intentions. They are assisted in this certification by use of photocopies which are exact reproductions from existing aerial enlargements on file in the county office. These photocopies contain all of the pertinent information with regard to the farm, including, in most cases, acreages of cropland in each field or plot.

In the event the producer wishes to subdivide a field for program purposes, he may obtain the exact acreage necessary for this purpose by requesting measurement service. This service is provided by the county ASCS office at a nominal charge. While it only applies to the Wheat and Feed Grain Programs, it has been estimated that this method has reduced the compliance cost in Michigan by at least fifty percent.

The following is a summary of compliance determinations made in Michigan during 1969:

#### SUMMARY OF 1969 COMPLIANCE ACTIVITY

Crop Or Program	:No. Farms :    Number of Compliance :		:No. Farms:		
	:Requiring : <u>Determinations Made By</u> :		:Receiving: No. Farms		
	:Acreage :	:	:Reduced :	Found Out	
	:Determina-:	:	: Payment :	Of Compliance	
	:tions	:Certification:	Farm Visit:		
Feed Grain-Wheat	86,491	73,261	12,357	538	213
Conservation Reserve	1,458	1,060	246	2	0
Cropland Adjustment	1,383	0	1,383	11	16
Cropland Conversion	23	0	23	0	0
